INTELLIGENT CCTV MONITORING

Mumbai, India

THE PROBLEM

Your cameras see everything. But who is watching?

Most organisations install dozens of cameras – then park the footage on a DVR and hope nothing goes wrong. By the time someone checks, the moment has passed.

Passive DVR systems

No proactive alerts. You only discover incidents after the fact – when damage is already done.

Data leaves India

Most cameras route footage to foreign cloud servers. Your data is not analysed in India, and DPDP compliance becomes a liability.

Yet another app

Existing solutions force your team to install proprietary apps. Alerts get missed because nobody checks them.

Terabytes of nothing

DVRs store hours of empty footage. Storage costs balloon while the one clip that matters is buried.

SOUND FAMILIAR?

- ? Did that person actually arrive – or did they leave without you knowing?
- ? Are unwanted visitors entering when your team should be working?
- ? Is your staff at their workstation – or are you paying for empty chairs?
- ? In a hospital: did a patient fall from the bed before anyone noticed?
- ? In a mall: how many people are inside right now – before it becomes a safety risk?
- ? In a factory: is there smoke, fire, or an intruder in a restricted zone?

WHAT BRIZY VISION DETECTS

People

Vehicles

Animals

Intrusion

Loitering

Fire

Smoke

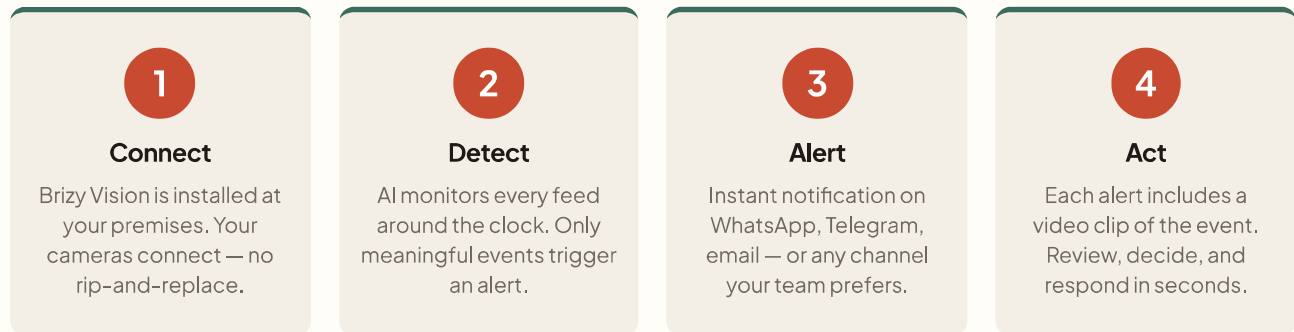

Crowd density

THE SOLUTION

Install once. Get alerted instantly. Act with proof.

Brizy Vision connects to your existing cameras and works quietly in the background. No technical complexity on your end — just real-time intelligence delivered where your team already works.

What changes for you

- ✓ No new apps to install or train staff on
- ✓ Alerts arrive in seconds, not hours
- ✓ Every alert backed by video proof
- ✓ Only action clips archived — not endless empty footage
- ✓ Your data stays in India, processed in India
- ✓ Storage costs drop dramatically

Behind the scenes, Brizy Vision handles the complexity — so your team can focus on running the business, not watching screens.

WHY BRIZY VISION

Built for reliability. Designed for India.

Distributed architecture

Queue-based processing with redundant workers. If one component fails, others pick up instantly — zero missed events.

Real-time processing

Events are detected, clipped, and delivered in seconds. Not minutes. Not hours. Seconds.

Scales with you

From 20 cameras to 200+. Add cameras, add workers — the system grows without re-architecting.

Data residency

All footage analysed and stored within India. Full compliance with DPDP and local data sovereignty requirements.

Smart archiving

Only event clips are stored — not 24/7 raw footage. Storage costs reduced by up to 90%.

Multi-channel alerts

WhatsApp, Telegram, email, SMS — alerts go where your team already lives. No proprietary app lock-in.

HOW WE COMPARE

CAPABILITY	TYPICAL DVR / HIKVISION	BRIZY VISION
Proactive alerts	X Manual review only	✓ Real-time, multi-channel
Alert speed	Minutes to hours	✓ Seconds
Data in India	X Often offshore	✓ 100% in-country
Storage efficiency	X 24/7 raw footage	✓ Event clips only
False positive reduction	Basic motion triggers	✓ AI-filtered, learns over time
Alert channels	Proprietary app	✓ WhatsApp, Telegram, email

PLANS

Choose the intelligence level that fits your operation.

Every tier is lightweight, efficient, and cost-economical. Pricing is tailored to your scale – speak with our sales team for a custom quote.

Basic Essential monitoring	Standard Vertical-aware intelligence	Premium Continuously learning AI
<ul style="list-style-type: none">✓ Standard AI detections (people, vehicles, fire, smoke)✓ Real-time alerts on one channel✓ Event clip archiving (30 days)✓ Data processed in India✓ Email support	<ul style="list-style-type: none">✓ Everything in Basic✓ Vertical-specific detection tuning✓ False positive reduction engine✓ Multi-channel alerts (WhatsApp, Telegram, email)✓ Event clip archiving (90 days)✓ Priority support	<ul style="list-style-type: none">✓ Everything in Standard✓ Continuous learning – accuracy improves over time✓ Custom detection models for your environment✓ Advanced crowd density & loitering analytics✓ Unlimited event clip archiving✓ Dedicated account manager

Continuously learning

The more cameras you add, the sharper the system gets for your specific vertical.

Fewer false positives

AI filters noise so your team only gets alerts that matter.

Lightweight & economical

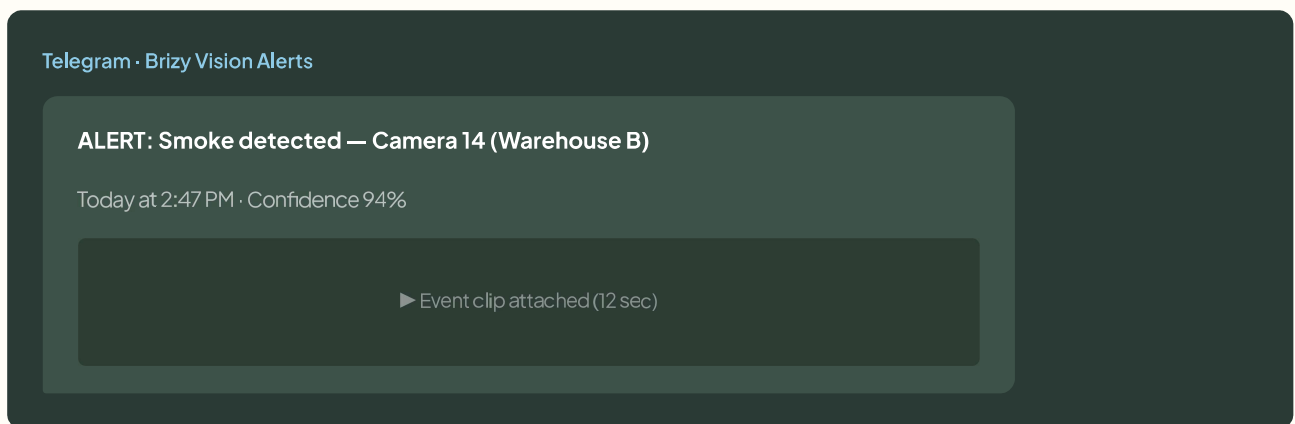

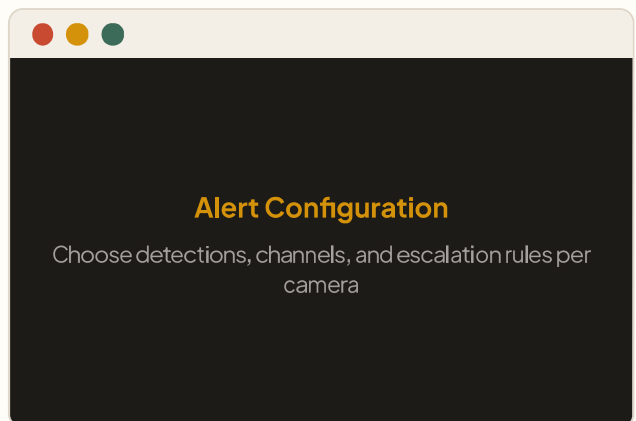

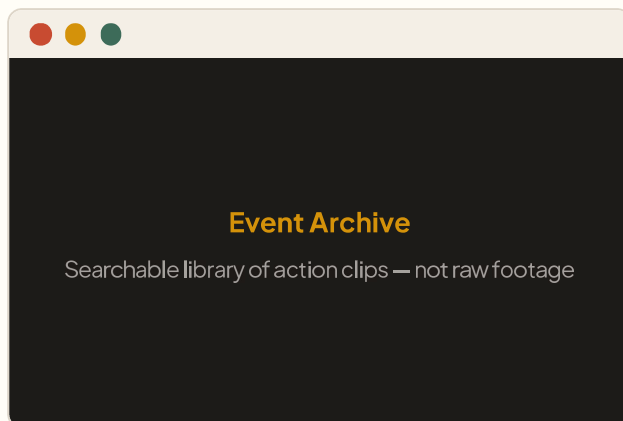

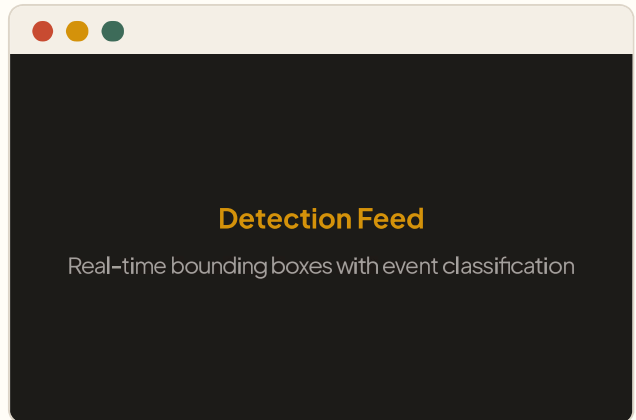

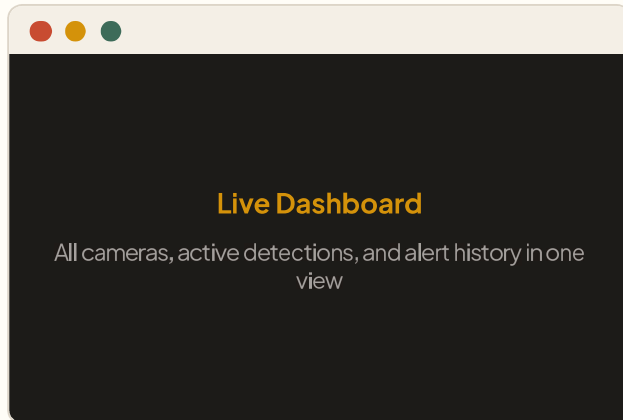

Runs efficiently on your existing hardware – no expensive cloud bills.

Pricing is customised. Volume, commitment, and feature requirements are discussed with your sales representative. Contact us for a tailored proposal.

SEE IT IN ACTION

What your team experiences every day.

Brizy Vision is currently in proof-of-concept. Here is what the live experience looks like.

Replace placeholder frames with actual screenshots when your POC is ready. The layout is designed to drop in real product images.

Security is not a feature. It is the foundation.

Brizy Technologies is built for enterprises that take data protection seriously – especially in regulated industries.

ISO

ISO Certified

Brizy Technologies holds ISO certification, demonstrating our commitment to information security management and operational excellence.

SOC 2

SOC 2 – In Progress

We are actively pursuing SOC 2 Type II compliance to meet the audit requirements of enterprise and government clients.

OUR GUARANTEES

100% data residency in India

All footage captured, processed, and archived within Indian borders. DPDP compliant.

99.9% uptime SLA

Distributed architecture with automatic failover. Your monitoring never sleeps.

End-to-end encryption

Footage encrypted in transit and at rest. Access controlled per role.

Configurable retention

You control how long event clips are stored. Delete on demand, export on request.

Dedicated support

Onboarding assistance, configuration help, and ongoing technical support from our Mumbai team.

GET STARTED

Ready to see more, know faster, and act now?

Schedule a live demo of Brizy Vision on your cameras. No commitment — just a clear picture of what intelligent monitoring looks like.
